

EARN EXECUTIVE

Proposals for G-boxes

issued by  
F Greisen  
May 18, 1989

-----  
We have two formal applications for a G-box, from Italy and Austria, respectively which are attached but unavailable in machine readable form.

The Austrian application is for a G-box to be connected to CERN.  
Provided

Austria can fund the link I propose we formally endorse that plan and go ahead with the detailed planning.

The Italian application is for connection a switch in CNUCE to the NT switch in CNUSC. I propose we offer either to connect the Italian G-box directly to the NT switch in CNUSC on an Italy-funded link, or, if Italy does not want this, to make a common investigation of the switch to switch connection.
