Access: Unrestricted

Following the last Executive meeting I have produced a proposal for the structure of a "standard" report to the Board of Directors. It is hoped that this will simplify and ease the problem of producing a good report for the Board.

It is envisaged that the various chairmen should produce the material and that an editor (the EARN Manager, Technical Director, or Secretary) should produce an introduction and put it together.

The Executive is invited to comment with a view to producing a definitive proposal.
