Meeting with CMPU

In letters from Peter Tindemans and Klaus Ullmann, EARN has been
encouraged to formulate one or more project proposals for COSINE. I
therefore had a meeting on November 16, 1989 with Chris Duxbury, the
manager of the interim CPMU.

Duxbury reported that the priority items for the first year of CIP -
to
start around 1.1.90 - were S1 (IXI), S2 (MHS), P2 (Information &
directories) and P6 (Multivendor FTAM etc.). He suggested that EARN
could take an interest in P2 and P6 plus, of course, P4 (Migration of
existing networks). For P4 we agreed that the first project phase
would
probably have to be a study (funded by COSINE) since the present
project
description is quite general.

Formally, all projects and services will be announced for public
tender
in due time.

Finally, Duxbury encouraged EARN to be recorded in the COSINE
register,
which I shall do.
