### 1 Directive

Each country is required to collect all international traffic data on all EARN international links for traffic to and from the country and to send them monthly to the "traffic data" co-ordinator before the 10th of the following month.

(The operation details are explained in the technical annex).

This directive should be implemented in order to have complete traffic data starting in September 1989.

### 2 Technical annex

The file which contains the traffic data must be sent to Dominique Dumas (BRUCH@FRMOP11) with the name "ccyymm DATA" (cc=Country Code, yy=year, mm=month).

The file must be produced by:

- Udo Mayer program (called CNTYACCT)
- Jose-Maria program (called CTRYSTAT)
- Any other program producing the same output

### 3 Results

The results are stored on LISTSERV@DEARN names "STATyymm DATA"
